

How to Get And Install JoikuSpot on the Phone

There are 3 simple ways to install JoikuSpot on your mobile phone:

1. Sending the JoikuSpot file to the phone via SMS
2. Downloading the file directly to the phone with your phone's web browser
3. Downloading the file to the PC, and transferring it to the phone using PC Suite or Bluetooth

1. Sending the JoikuSpot file to the phone via SMS

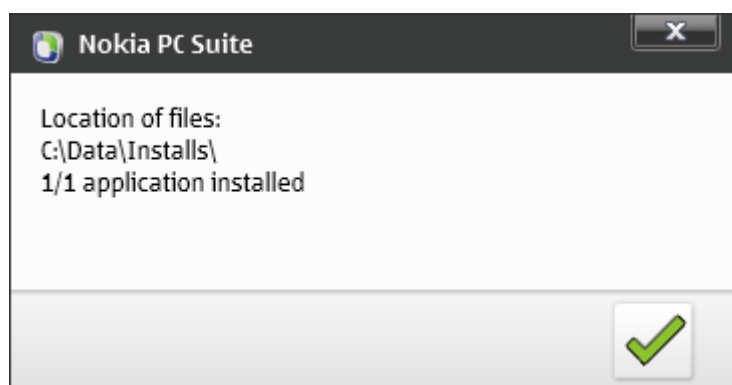

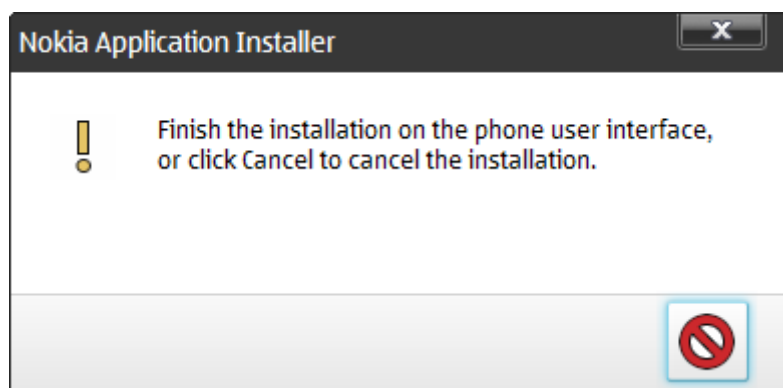

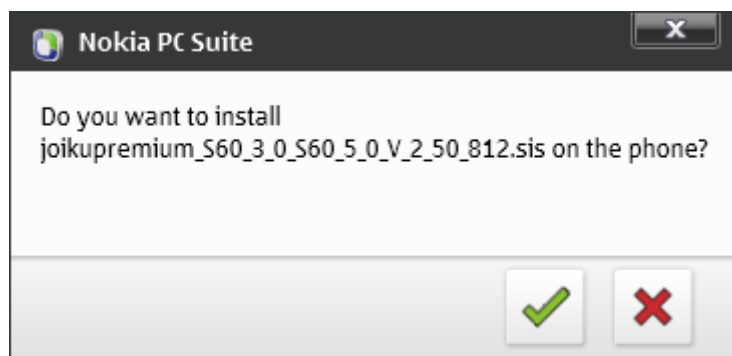

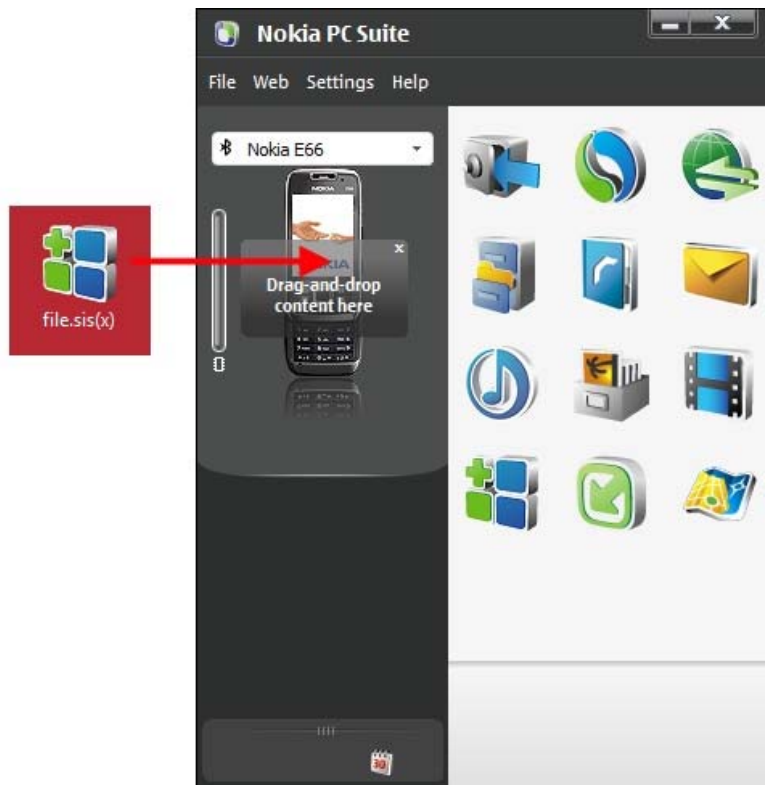

- Go to JoikuSpot Premium [FREE TO TRY](#) with your web browser
- Select your phone model (on the right hand side of the screen)
- Enter your phone number in international format and click SEND button (on the right hand side of the screen)
- The file is received as SMS Download link to your phone. Click on the download link and follow the installation instructions.

2. Downloading the file directly to the phone with your phone's web browser

- Go to www.joikuspot.com/mobile with your phone's web browser
- Select your phone model from the drop-down menu
- Click the "Download JoikuSpot" button
- The file is downloaded to your phone, and automatic installation starts. Follow the installation instructions.

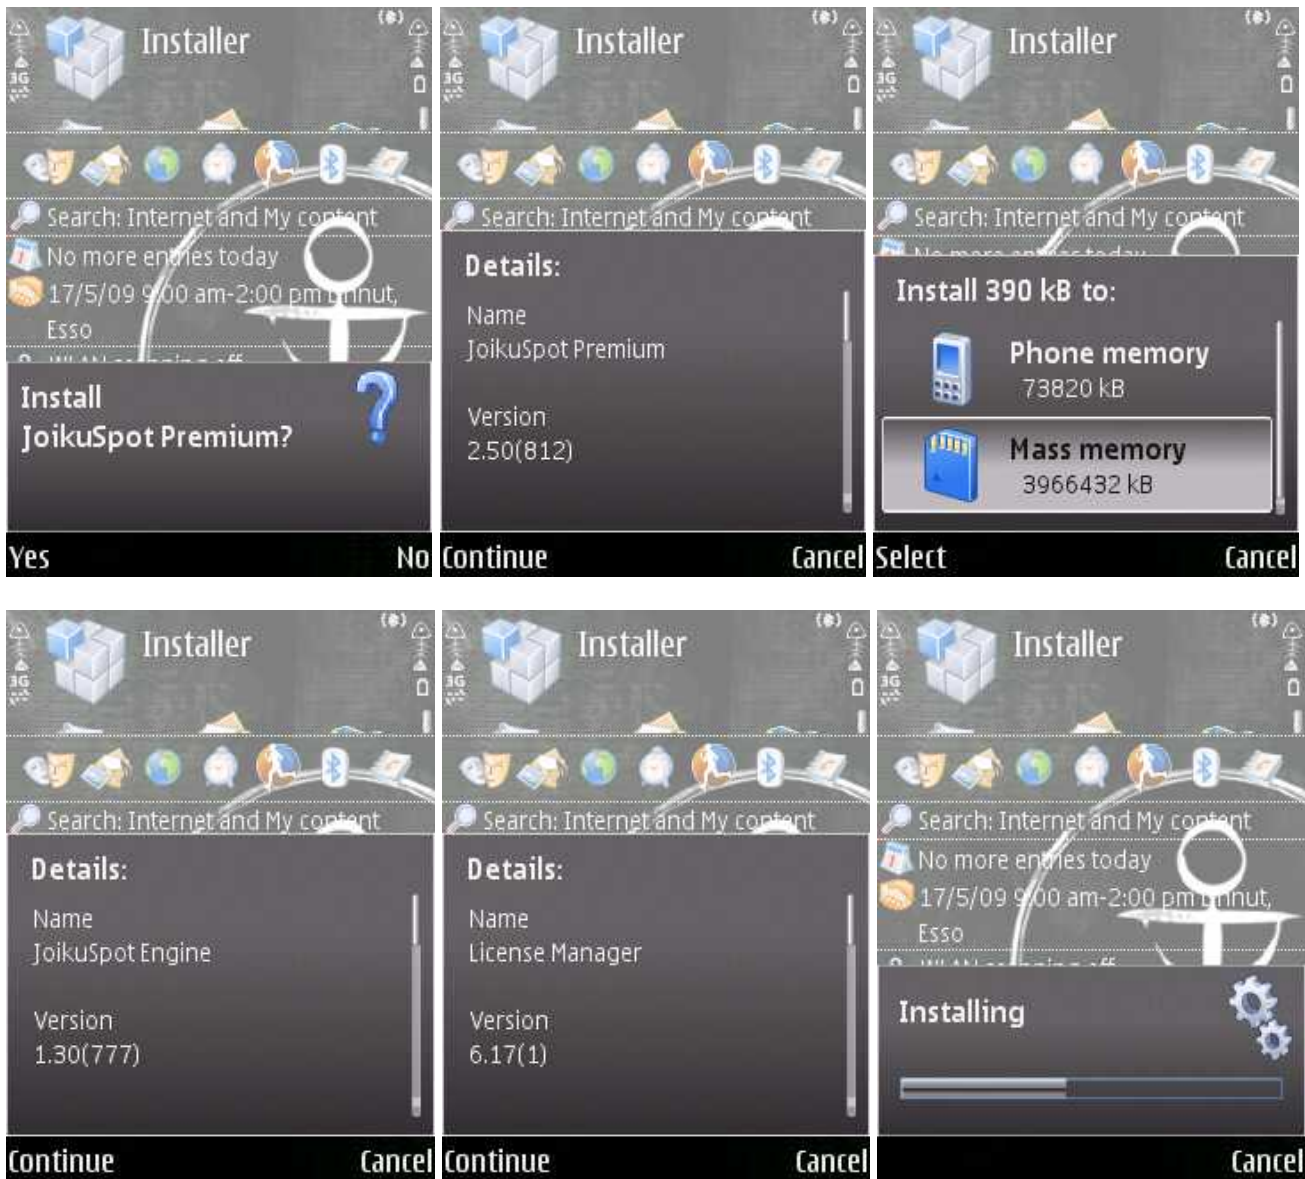

3. Downloading the file to the PC, and transferring it to the phone using PC Suite or Bluetooth

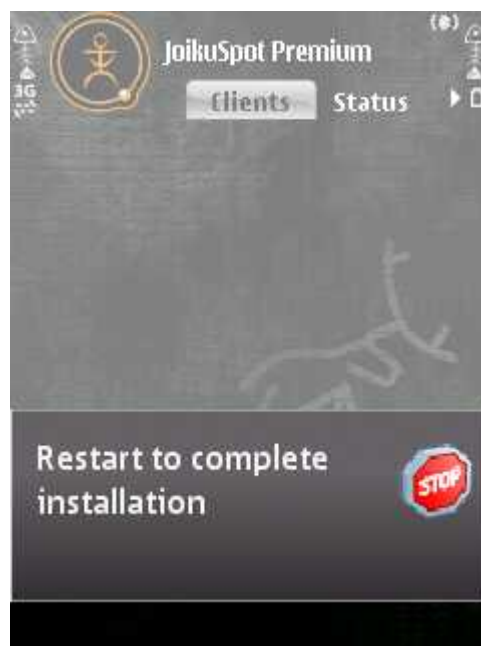

- Download the JoikuSpot file first to your PC
- Use Bluetooth to transfer the file from your PC to your phone, OR connect your phone with Nokia PC Suite and then simply drag and drop the JoikuSpot .sis file on top of the phone image (see the below illustration for PC Suite file transfer)

The following illustrates the installation of JoikuSpot on your phone.

Depending on the phone model, the installation may take some time, so please be patient while installing the file. After installation the file can be found in Applications or Installations folder on your phone menu.

Remember to restart your phone to complete installation. After restarting the phone the installation is complete and WLAN drivers are adjusted, and you can locate the program under Applications or Installations menu in your phone (see below pictures of where your product will be installed in your phone).

Activation

You are now ready to activate JoikuSpot. Click on JoikuSpot icon on your phone. The application will first ask you to “Update purchase options”, after which you can activate your licence by entering the licence code, or in case of trial file, activate the trial. Please make sure you select your operator’s Internet access Point for connection. WAP, MMS or WLAN access points will not work. Your operator’s Internet access point is typically called “Operator X Internet”.

After licence activation, JoikuSpot will start, and share your phone’s 3G internet connection over Wi-Fi (WLAN) with your laptop, iPod or other WLAN device.

See [JoikuSpot FAQ](#) or [JoikuSpot Premium User guide](#) for help.

In case of problems with file purchase, download, installation, activation or use, please visit www.joikushop.com and follow the HELP link for customer support.
